Introduction

| | | |
|-------------------------|--|-----|
| Campbell, James W.P. | Overview | i |
| Addis, Bill | The contribution made by the Journal Construction History towards establishing the history of construction as an academic discipline | iii |

Session papers

| | | |
|-----------------------------------|---|----|
| Aprèa, Salvatore | The early German production and use of modern hydraulic binders: between English influences and the search for a scientific approach, 1817-1839 | 1 |
| Beech, Robert | Form v function: the structural development of early fifteenth-century hammer-beam roofs | 9 |
| Bell, Paul | Some examples of structural innovation in the construction of English churches in the long nineteenth century | 17 |
| Byng, Gabriel | ‘Fabric wardens’ and the organisation of parish church construction in the late Middle Ages | 25 |
| Calderón-González, Alberto | Strategies for the accord of Gothic and Classical stone construction systems in 16th- and 17th-century buildings in Northern Spain | 35 |
| Cardellicchio, Luciano | Pier Luigi Nervi vs Fazlur Khan: the developing of the outrigger system for skyscrapers | 47 |
| Carvais, Robert | A digital edition of the didactic knowledge of construction: a critical edition of the courses of Antoine Desgodets, professor at the Académie Royale d'Architecture (Paris, 1719-1728)* | 59 |
| Chou, Y. & Theodossopoulos, D. | Building material migration: imported brick and localization in Taiwan in the seventeenth century | 71 |

Contents

| | | |
|--|---|-----|
| Clarke, Linda | Building by Direct Labour: the significance of Direct Labour Organisations (DLOs) in the provision of public housing in the UK 1890-1980 | 81 |
| Dekeyser, L. & A. Verdonck | Knowledge transfer of vernacular finishing techniques in the interwar period: on the history of cimorné render | 91 |
| Domin, Christopher | Hang the roof: building the aerial site | 101 |
| Fleming, P., S. Singler & M. Ramage | Construction history and alteration of the oak roof structure of the Sidney Sussex College Hall | 113 |
| Fuertes Dopico, O. & J. F. Madrid | The traditional wooden shipyards on the northwest coast of Spain | 121 |
| García-Ares, J. A. & F. Tellia | Some instances of arch and vaulting construction at the New York Public Library | 131 |
| Gelder, John | Two Egyptian curves revisited | 145 |
| Gilento, Piero | A proposal for cataloguing the building techniques in Roman-Byzantine and Islamic Jordanian Hawrān. Stratigraphy and Chrono-typology: the Umm as-Surab village | 157 |
| Gonzalez-Longo, Cristina | The transformation of Drumlanrig Castle at the end of seventeenth-century | 169 |
| Govaerts, Y., A. Verdonck, M. de Bouw & W. Meulebroeck | The introduction of ready-mix rendering mortars for stone imitation in Belgium [1920-1940] | 181 |
| Greco, Laura | The evolution of building techniques in the Italian Alpine context from the 1950s-1960s. The case of the Church in Corte di Cadore by Edoardo Gellner and Carlo Scarpa (1956-1961). | 191 |
| Heath, J. & J. Miller | A history of structural defects and repairs, the Iron Bridge, Shropshire | 201 |
| Heyman, Jacques | Wren's domes | 209 |
| Holzer, Stefan M. | Mixing concrete – remarks on the early history of modern concrete | 219 |

| | | |
|--|--|-----|
| How, Chris | The British cut clasp nail | 231 |
| Lucey, Conor | The developer, the builder, his contractors and their tradesmen | 239 |
| Mändel, Maris | Dreaming of a cementless future: the story of silicalcite | 249 |
| McWilliam, Robert C. | Transferring construction technology and conflicts of interest - a century ago | 257 |
| Méndez, Francisco J. R. | Spatial unification of Romanesque churches in Zamora and its influence on the buttress system | 263 |
| Mobus, Melody | Surviving late payments: strategies of Christopher Wren's masons from Burford | 273 |
| Moksnes, Jan | Concrete Platforms in the North Sea – a golden era for development of advanced concrete structures | 281 |
| Nozhova, Ekaterina | Timber hyperbolic lattice structures: Shukhov revisited | 289 |
| O'Dwyer, D. & R. Cox | Old Ennisnag Bridge | 301 |
| O'Dwyer, D., J. Cummins & R. Cox | John Rennie's Dublin cast-iron trusses | 313 |
| Pan, Y. & J.W.P. Campbell | Timber supply in colonial China, 1840-1940 | 323 |
| Pérez-de-los-Ríos, C. & E. Rabasa-Díaz | Stretched templates in Gothic tas-de-charge construction | 333 |
| Pliego de Andrés, E. & A.S. Álvarez | Robert Willis' contribution to understanding the Gothic Flamboyant style | 343 |
| Pugnale, A. & A. Bologna | Dante Bini's air structures (1964-1979). From early Italian prototypes to the Australian experience. | 355 |
| Robson, K.F. & S. Ghosh | Lean principles in the design and construction of the Empire State Building | 367 |

Contents

| | | |
|--|--|-----|
| Smyth, Fiona | Acoustic Design in the 1930s: Robinson and Keefe's Church of Corpus Christi, Dublin | 377 |
| Stoppioni, Benedetta | New technologies for a new society: German museum architecture after 1945 | 391 |
| Theodossopoulos, Dimitris | Stone barrel vaulting in late medieval churches in Scotland | 403 |
