Preliminaries

| | | |
|-------------------|--------------|---|
| J. W. P. Campbell | Introduction | i |
|-------------------|--------------|---|

Epistemology of Design

| | | |
|----------------------------------------------|--------------------------------------------------------------------------------------------------------|----|
| W. Addis | The epistemology of engineering design as a contribution to construction history | 3 |
| J. Giron | Understanding Roman construction before A Choisy: Piranesi and his influence on Rondelet | 11 |
| J. Ginovart, , A. Costa, S. Coll, & M. López | Hooke's chain in the Spanish Enlightenment of the XVIIIth century | 23 |
| Y. Pan, & J.W.P. Campbell | The influence of English books on building construction on early 20th century Chinese Building Manuals | 33 |
| R. Hayes | The Role of Construction Drawings in the Lutyens Memorial Volumes | 43 |

The Seventeenth-Century Building World

| | | |
|---------------------------------|-------------------------------------------------------------------------------------------------------------|----|
| J. Stephenson | The organisation of labour and craftsmen in 17th century London building trades | 57 |
| R. Guerra-Pestonit,& P. Fuentes | The grand staircase of the Colegio del Cardenal in Monforte de Lemos (Spain): revisiting a daring structure | 67 |

The Manufacturing of Materials

| | | |
|------------|---------------------------------------------------------------------------------------------------------------|----|
| C. How | Early Steps in Nail Industrialisation | 81 |
| W. Andrews | Wallpaper's role in Construction History: innovations in wallpaper manufacture in the 19th and 20th centuries | 91 |

Contents

Nineteenth-century Industrialisation and the Arrival of the Railways

| | | |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------|-----|
| R. Thorne | Railway Engineering and the Picturesque | 105 |
| R. O'Dwyer & R. Cox | Early Irish Railway Construction | 121 |
| A. Núñez, R. Jiménez & M. Pérez | Lorca- Baza Railway Line. British civil engineering in Southeast Spain 1890-1894 | 133 |
| G. Patiño & P. Gimeno | The transfer of a British Victorian architecture of smoke to the industrial brickwork chimneys of Eastern Spain | 143 |

Building the Houses of Parliament

| | | |
|-----------------|-------------------------------------------------------------------------------------------------------------|-----|
| J. Zhao | The architecture of the not-quite –well-tempered environment- on the making of the new houses of Parliament | 157 |
| H. Schoenefeldt | Reid's short-lived ventilation system for the Permanent House of Commons, 1847-54 | 167 |

Steel and Concrete in the Early Twentieth-Century

| | | |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| N. Bill | Building the Domed Reading Room of the Melbourne Public Library | 183 |
| C. Weber | Les Bains Municipaux at Strasbourg (1905-1908) – an example of cultural and technical transfer between France and Germany | 199 |
| L. Slivnik | The seismic isolation of the first skyscraper in Ljubljana, Slovenia | 209 |
| R. MacInnes | Architecture, Materials and Construction in the UK at the turn of the 20th Century: the Strange Case of Charles Rennie Mackintosh and the Glasgow School of Art | 219 |
| D. Yeomans | The welded structure of the De La Warr Pavilion | 235 |

Prefabrication

| | | |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| K. Draper | The military hutting programme in Britain during the Second World War: A brief survey of development, uses and building materials | 243 |
| P. Cassinello | Eduardo Torroja's 1949 International Housing Competition on Industrial Design | 253 |
| M. ndel | Stagnation and innovation in prefabricated large-panel technologies in the USSR: A case study of production in the Tallinn house-building plant | 263 |

Post 1945 construction

| | | |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------|-----|
| S. Mornati & L. Greco | The Galfa Tower by Melchiorre Bega (1956-1959): the renewal of building technologies in the face of Italian tradition | 275 |
| M. Zordan & F. Fragnoli | The curtain wall experimentation in italian building office: the sixties | 287 |
| A. Rosellini | Joint, growth and ornament of Kahn's cast-in-place concrete | 297 |
| M. Taub & K. Prater | Re-envisioning Historic Catalan Vaulting Techniques: A case study in Medellin, Colombia | 309 |
