Preliminaries

Campbell, James WP.	Introduction	i
---------------------	--------------	---

Ancient World

Amici, Carla Maria	<i>Opus Caementicium</i> in the Roman Age [4th/3rd Century BC – 4th/5th Century AD]: a Revolution in Building Techniques	3
Albrecht, Luise & Döring-Williams, Marina	Roman Concrete Groin Vaults: Design and Construction Principles, Formwork and Falsework for the so-called Cenotaph of Annia Regilla, Rome	13

Middle Ages

Wendland, David & Gielen, Mark	Some considerations on the early development of cross vaults and rib vaults in medieval architecture	29
Beltramo, Silvia	Pointed arches and ribs in the cross vaults of twelfth and thirteenth century religious buildings in northwest Italy	43
Lengenfeld, Jonas	Some points on the construction of high medieval slewing cranes in towers in Germany based on Building archaeology and a new find from the early 13th century	57
Knobling, Clemens	Building a vault on an unusual layout: the gothic church of Greifensee (CH)	75

Contents

Vandenabeele, Louis & Voigts, Clemens & Pfister, Marius & Holzer, Stefan M.	Deciphering 800 years of brick history at the Basilica of St Anthony in Padua: production, finishing and bonds	91
---	--	----

The Seventeenth Century

Carocci, Caterina & Macca, Valentina	Masons, nobles and viceroys. Building techniques in ancien régime Sicily. The Granfonte district in Leonforte.	105
Finocchiaro, Renata & Tocci, Cesare	Masons, nobles and viceroys. Building techniques in ancien régime Sicily. Catalan vaults in Poggioreale.	119
Kunquan, Feng & Wenjun, Feng & Xiaomei, Yuan	Explication of the Working Mechanism of the Water Organ in European Classical Gardens	131
Schmitt, Rebecca Erika	The geometric design of Christoph Dientzenhofer's 'radical' vaults	143
Burgassi, Valentina	Floor construction techniques at the Savoy court in the 17th and 18th centuries with a focus on craftsmen and manufacture of wooden floors	157

The Eighteenth Century

Burchardt, Jørgen & Jørgensen, Steffen Elmer	Transferring bridge and road construction technology in the late 1700s: French engineer Jean Marmillod as an innovator in Denmark	171
Marconi, Nicoletta & Giannetti, Ilaria	The revolving scaffolding for the restoration of the Pantheon dome (Giovanni Corsini, 1756). Historical survey, virtual and physical models	187
Chrimes, Mike	The Boughs and the mechanisation of construction in the Canal Age 1760-1820	201
Chrimes, Mike	Canal tunnel mortars-1760-1830: an addendum to Thomas Telford and the construction of canal tunnels 1794-1830	219

The Nineteenth Century

Guagliardi, Valentina	Nineteenth-century architecture and building traditions in the territory of Cosenza: the ancient village of “Silvana Mansio”	233
O’Dwyer, Dermot	The Halpins – Irish Lighthouse Builders 1810-1862	243
Bill, Nicholas A.	British Military Engineering Publications and the Transfer of Construction Technology: 1812-1914	255
Esponda, Mariana & McBain, Catherine	Laying The Foundation: The Use and Evolution of Concrete as Ottawa’s Primary Building Material	269
Russnaik, Kylie M. & Schäfer, Jasmin	Leonhard Zeugheer and his English-inspired roof structures in Zurich	285
Degraeve, Matthijs	Transient or resilient? Long-term change in firm longevity in the construction sector (Brussels, 1830-1970)	299
Volpiano, Mauro	Building in industrialising Italy. Decorative cement and artificial stone in the constructions of Enrico Petiti (1832-1898)	311
Zhang, Tian	The Modernisation of the Constructors: A Study of the Transformation of Construction Company Guilds in Shanghai 1843-1949	323
Shirani, Taban & Schoenefeldt, Henrik	Lighting Design of Semi-permanent Building for the 1862 International Exhibition	335
Isaacs, Nigel & Brown, Andre	The Odious and Vexatious History of Building Code Requirements for Openable Windows	349
Isaacs, Nigel	Building Paper 1868 to 1884: a growing child	359
Chen, Yunlian	Supply and Manufacture of Concrete in Harbour Construction in Modern East Asia: A Case Study of Yokohama	369

Contents

Giannetti, Ilaria & Mornati, Stefania	The Development of Compressed-air Foundations in Italy: the Tiber River Embankments (1876-1900)	383
---------------------------------------	---	-----

The Twentieth Century

Chiovelli, Renzo & Palma, Giulia Maria & Rocchi, Vania	An early reinforcement intervention disguised in the architectural restoration: the reinforced concrete beam of the Papal Loggia of Viterbo	397
Korensky, Vladimir	Contribution of Europeans to the Further Development of Reinforced Concrete in the Russian Tsarist Empire	411
Packet, Tom	Concrete proposals: the reception of Thomas A. Edison's monolithic concrete house and discussions on mass-produced housing for the working classes in pre-war Belgium, 1911-1913	423
Boggero, Tullia	History of an aqueduct	435
Van de Voorde, Stephanie & Wall, Christine	Fast, cheap and durable; the use of monolithic no-fines concrete for housebuilding in the UK and Belgium 1920-1975	445
Fivez, Robby	"Des millions à l'eau": European 'experts' and the construction of the Ango-Ango harbour, the Belgian Congo, 1925-1930	459
Schmid, Benjamin & Weber, Christiane	New Materials for Model Analysis of Engineering Structures – Micro-concrete versus Acrylic Plastic	473
Loi, Maria Cristina & Paris, Vittorio & Resmini, Monica	From Italy to Ethiopia: in search of the perfect cement	487
Bulckaen, Laurens & Devos, Rika	The Belgian Architects' Act of 1939: turning point or gradual shift? Professional discussions and legal framework affecting the historical collaborative efforts of the building professionals.	499

Rohan, Mathumitha Madalena	The changes in architectural design: adoption of environmental innovations for comfort and conservation. Case Study: Canterbury Cathedral's Heating System Retrofit, 1942-48.	511
Wery-Maury, Marc- Allan	The evolution of the construction principles of microwave towers between 1949 and 1984: Comparative study of the French and British contexts	521
Chen, Yichuan	From industrialised prefabrication to 'mobilising the masses': Soviet influence and the dissemination of prefabricated concrete bridges in China, 1957-1966	535
Un, Hubert & Zeng, Chuqing & Huang, Zhanlin & Xia, Heng	Tectonic Study of the Diverse Tie-rod Arch Systems in South PRC (1960-1970s)	549
Angillis, Jelle	Building a profile? Belgian general contractor Van Coillie and its construction activities in the 1960s	563
Ladinski, Vladimir	The UK Contribution to the Post 1963 Skopje Earthquake Recovery and Reconstruction	579
Lagae, Johan & Fizez, Robby	Tracing Mobutu's Spectre in Kinshasa's Concrete Skyline through a builder's archive: the case of the Ministry of Foreign Affairs.	593
Heinrich, Annkathrin & Mende, Volker & Hoyer, Sebastian & Thiele, Klaus	Material Lightness in Steel Building Construction: Lightweight Construction in the GDR - Aerated Concrete	607
